

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable. Thier are alot of elderly people that have cell phone in case they brake down on the road. Please when making this decision you think about your mother,father,sister,brother and even your grandparents stuck along side the road and no phone to call for help. And the only reason that they are sitting there in the freezen cold is because you can't keep your hand off the "I need more money" situation.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I am very tied of, when something isn't broke you law makers think you need to fix it. As the saying goes If it isn't broke dont fix it. Money hungry law makes really need to let people live a piecefull life. Money isn't everything eventhough its nice. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Shelly Thomas
